Subject: Scoping Summary Report - Navy Old Town Campus Revitalization Project

Navy Old Town Campus (OTC) Revitalization

Scoping Summary Report Now Available on Project Website

We hope this email finds you and your family well during the COVID-19 pandemic. While providing full support for the critical federal, state, and local COVID-19 efforts, the Navy continues to move forward with preparing an Environmental Impact Statement (EIS) for revitalization of NAVWAR (Naval Information Warfare Systems Command) facilities at OTC. Revitalization of NAVWAR's facilities in San Diego is critical to supporting the Navy's mission and is urgently needed.

A public scoping summary report is now available on the project website at: www.NAVWAR-Revitalization.com/documents/.

The scoping summary report summarizes key topics included in scoping comments from the public, organizations, and agencies. The scoping summary presents the Navy's approach for addressing these topics in the Draft EIS. The scoping summary report also describes the Navy's notification and outreach activities during the public scoping period. From January 24, 2020, through February 24, 2020, the Navy held a public scoping period to receive public input on issues to be considered for analysis in the EIS.

The next opportunity for public participation will occur in summer 2020 when the Draft EIS is released for public review and comment. The Navy is exploring options for virtual public engagement and for receiving public comment remotely should COVID-19 public meeting guidance still be in place. The Navy will continue to engage with the public through email notices such as this and regular updates to the project website. Once stay at home guidelines are lifted, the Navy will resume attendance at community planning group meetings and other events.

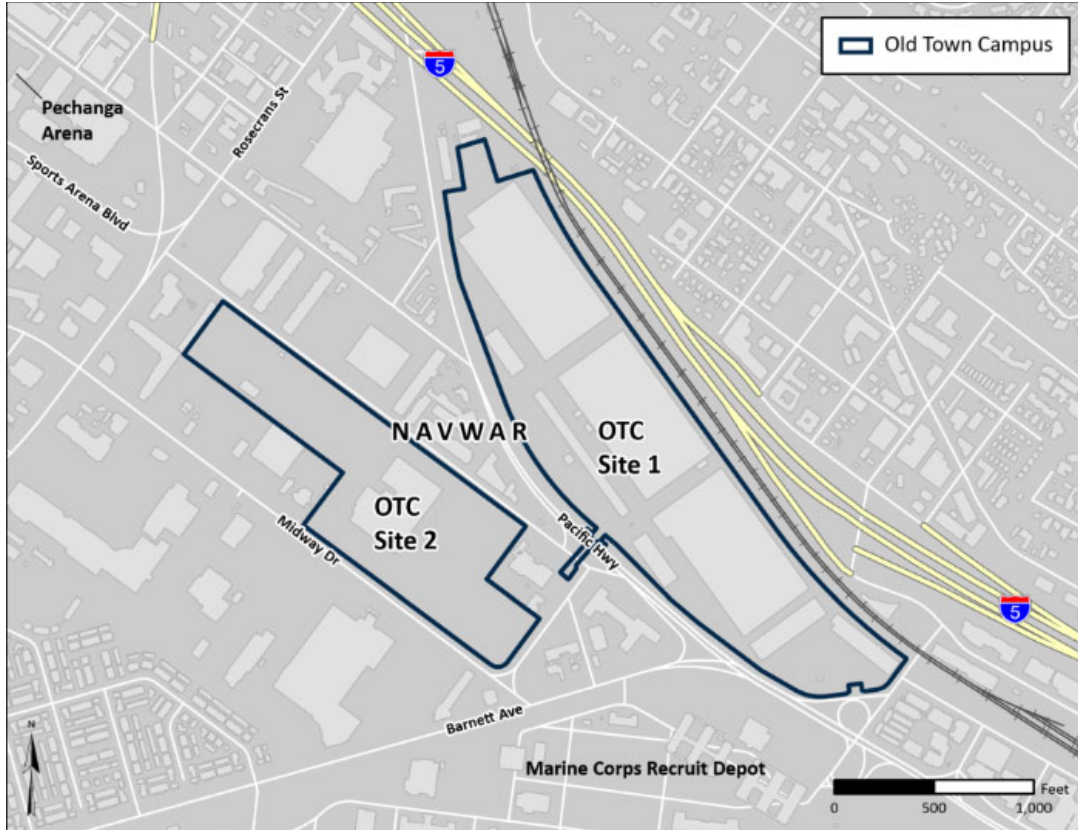

Pursuant to the National Environmental Policy Act (NEPA), the Navy is preparing an EIS to evaluate the potential environmental effects associated with revitalization of the OTC to support NAVWAR's current and future operational readiness. The EIS will also address the provisions of the California Environmental Quality Act (CEQA) as it relates to non-federal development within the proposed alternatives. The Navy is proposing to demolish existing facilities and construct new buildings, utilities, and infrastructure at the OTC. Specific proposed actions could include Navy recapitalization of the site or redevelopment through a public-private development, including the consideration of a potential Transit Center.
